- Personal Counselling
- Care share Forum

Experiential Learning Methodologies

A) Field Visit Jyoti Granite by Botany Dept

B) Visit to the Botanical Garden

.V.M Arts, Science and Commerce College, Ilkal-587125

Report on Study tour to Almatti for VI B.Sc. Botany students

Submitted to The Principal

Excursion In charge: Asst.Prof Rohini S Pol (Head of the Botany Department)

Staff Accompanied for the study tour: Mr. Meghsham K & Miss Padamanjali
Attender Mr. Angadi

No of Students: 54

Date: 01/03/2020 Time: 9:00 am to 6:00 pm Day: Sunday

Objective of the visit: To study the Medicinal Plants in Almatti Nursery affiliated to Karnataka Forest Department.

About the place:

The Lal Bahadur Shastri Dam is also known as Almatti Dam is a hydroelectric project on the [Krishna River](#) in [North Karnataka](#), India which was completed in July 2005. The target annual electric output of the dam is 560 MU (or GWh) beside Dam there is Nursery by Karnataka Forest Department situated about 54 kms from Ilkal. Varieties of plants belonging to different plant groups were grown. Nursery is well maintained and managed along different plant species, it is pleasurable to walk and observe the plants with their Botanical name and common name.

Nursery had Ploy houses and Greenhouses. To name a few plant species *Alstonia scholaris*, *santalum album*, *Tectona grandis*, *Adathoda zeylanica*, *Phyllanthus emblica* etc were grown.

Purpose of the tour:

To Borden student's horizons and knowledge through introduction of plant diversity especially the medicinal plants.

Apply knowledge and skills in Lecture and Laboratory

As a training tool for planning and implementation of Nursery by direct observing the species and habitat.

Explore the possibility to do research in medicinal plants.

Strengthen the friendship among students and student Teacher's relationship.

Medicinal Plants

Medicinal plants may be defined as those plants that are commonly used in treating and preventing specific ailments and diseases and that are generally considered to be harmful to humans. These plants are either “wild plant species” those growing spontaneously in self-maintaining populations in natural or semi-natural ecosystems and could exist independently of direct human actions or the contrasting “Domesticated plants species” those that have arisen through human actions such as selection or breeding and depend on management for their existence.

Herbal medicines proved to be the major remedy in traditional system of medicine. They have been used extensively in medical practices since ancient times. This prompts the development in the practices of medicinal plants. The reasons are because of their biomedical benefits as well as place in cultural beliefs in many parts of world in the development of potent therapeutic agents. During 1950-1970, approximately 100 plants based new drugs were introduced in the USA drug market including deserpidine, reseinnamine and vincristine which are derived from higher plants.

Medicinal plants have provided mankind a large variety of potent drugs to alleviate or eradicate infections and suffering from diseases in spite of advancement in synthetic drugs, some of the plant-derived drugs still retained their importance and relevance. The use of plant-based drugs all over world is increasing. There have been records of advances made in the modern (synthetic) medicine there are still a large number of ailments or infection (diseases) for which suitable drugs are yet to be found. These have brought an urgent need to develop safer drugs (both for man and his environment) for the treatment of inflammatory disorders, diabetes, liver diseases, and gastrointestinal disorder. Through recent researches on herbal plants or medicine, there have been great developments in the pharmacological evaluation of various plants used in traditional systems of medicine. Consequently, plants can be described as a major source of medicines, not only as isolated active principles to be dispensed in standardized dosage form but also as crude drugs for the population. Modern medicines and herbal medicines are complimentarily being used in areas for health care program in several developing countries such as countries in Africa, Asia and some part of Europe. Due to different outcomes on herbal plants, plant products surfaces all over the world due to the belief that many herbal medicines are known to be free from health and environmental effects. The fear of the masses in the utility of synthetic drug or modern drugs is always accompanied with its single or multiple adverse or health effects.

In Karnataka according to the study of the Botanical Survey of India there are 3924 species belonging to 1323 genera and 199 families in the forests, of which 1493 species are of medicinal value. These belong to 808 genera and 108 families.

We left around 9.08am in the morning and returned around 6.pm in the evening.

Mr.Mallikarjun Forester explained about the Nursery and Plants

Demonstrating growth and habitat of *santalum album* and many such plants.

Polyhouse in Nursery

Outcome of the Study tour:

Field trips to natural environments provide opportunities for students to learn, develop new interests, and improve environmental attitudes and behaviours. This study points to the importance of strong pedagogy in these learning environments, particularly when the guide is instrumental in shaping the field trip activities.

On a guide-directed field trip, when the guide tells interesting stories, offers opportunity for exploration, explains discoveries, relates experiences to everyday life, and clarifies concepts learned in College, students experiences can be enhanced, with greater learning, attitudes, and changes in environmental behaviour.

It was an amazing and informative trip to Nursery. We got to see different types of plants flowers and trees which have medicinal value. We learned scientific names of many plants and some of their taxonomic features.

By seeing the structure and function of Polyhouse and Greenhouse, we learnt that we can take floriculture and Horticulture as a profession which can certainly reward us with good results.

We learnt and saw the different types of gardens and parks.

S.V.M Arts, Science and Commerce College, Ilkal-587125

Report on Study tour to Horticulture University Bagalkot and Almatti Garden for

B. Sc.VI Botany students

Submitted to The Principal

Excursion In charge: Asst.Prof Rohini S Pol (Head of the Botany Department)

Staff Accompanied for the study tour: Miss Veena P.N & Attender Mr. Angadi

No of Students: 27

Date: 09/06/2022

Time: 8:00 am to 8:00 pm

Day: Thursday

Objective of the visit: To Visit Biotechnology Laboratory, Fermenters, To study vegetative propagation techniques and To study the Medicinal Plants in Almatti Nursery affiliated to Karnataka Forest Department.

About the place:

The University of Horticultural Sciences, Bagalkot Karnataka is the third Horticulture University in the country and first in the State, which came into existence through a Special Ordinance issued by the Governor of Karnataka vide No.2 of 2008 on 22nd November, 2008 and duly enacted by Karnataka Act No.11 of 2010 dated 13-05-2010. Bagalkot was rightly chosen for university headquarters as the district is known for its rich horticultural production base of grapes, pomegranate, banana, lime, sapota, ber, fig, vegetables, beetle vine, coconut, spices and medicinal plants. This region possesses congenial climate for production of all kinds of horticulture crops besides its rich historical and cultural heritage making it an ideal place as headquarter of the Horticulture University.

The Lal Bahadur Shastri Dam is also known as Almatti Dam is a hydroelectric project on the Krishna River in North Karnataka, India which was completed in July 2005. The target annual electric output of the dam is 560 MU (or GWh) beside Dam there is Nursery by Karnataka Forest Department situated about 54 kms from Ilkal. Varieties of plants belonging to different plant groups were grown. Nursery is well maintained and managed along different plant species, it is pleasurable to walk and observe the plants with their Botanical name and common name.

Nursery had Ploy houses and Greenhouses. To name a few plant species *Alstonia scholaris*, *santalum album*, *Tectona grandis*, *Adathoda zeylanica*, *Phyllanthus emblica* etc were grown.

Purpose of the tour:

To study biotechnology instruments and their working.

To study the mechanism of Plant Tissue Culture Laboratory

To Borden students' horizons and knowledge through introduction of plant diversity especially the medicinal plants.

Apply knowledge and skills in Lecture and Laboratory

As a training tool for planning and implementation of Nursery by direct observing the species and habitat.

Explore the possibility to do research in medicinal plants.

Strengthen the friendship among students and student Teacher's relationship.

We left around 9.00am in the morning and returned around 8.00 pm in the evening.

Asst Professor. Satish Fatepur explained about the Nursery, Vegetative Propagation, Artificial Propagation and its techniques.

Demonstration of growth and habitat of plants in Polyhouse

Mr. Swami Gardner explained the techniques of Artificial Propagation

Asst Professor Rudresh explained the working of Fermenters in Biotechnology Laboratory

Asst Professor Rekha explained the working of Biotechnology Instruments.

Asst Professor Rekha explained mechanism of Tissue Culture Laboratory

Outcome of the Study tour:

Field trips to Horticulture University and Nursey, natural environments provide opportunities for students to learn, develop new interests, and improve environmental attitudes and behaviours. This study points to the importance of strong pedagogy in these learning environments, particularly when the guide is instrumental in shaping the field trip activities.

Develop the basic laboratory techniques of a biotechnology or bioscience lab, Supplement and enrich the lecture portion of the course, which deals predominantly with biotechnology techniques, Develop critical thinking skills in the students, Encourage teamwork and accountability among the students, Practice accuracy in calculations and in writing scientifically, Develop multitasking skills, Encourage students to take charge of their learning, Learn the responsibilities associated with working in a company

It was an amazing and informative trip to Laboratory and Nursery. We got to see different types of plants flowers and trees which have medicinal value.

By seeing the structure and function of Polyhouse and Greenhouse, we learnt that we can take floriculture and Horticulture as a profession which can certainly reward us with good results.
